Foundations of Red Hat Cloud-native Development

Managing Cloud-native Applications with Kubernetes

Advanced Application Management with Red Hat OpenShift

Alexandre dos Santos Ferreira

has successfully completed the online, non-credit Specialization

Cloud-Native Development with OpenShift and Kubernetes

In this specialization, learners developed their foundational knowledge of containerized workloads to explore Kubernetes and the Red Hat OpenShift Container Platform (RHOCP) as containerized orchestration platforms. This specialization focused on skills needed to deploy, configure, scale and troubleshoot container applications.
